

**POSITIONS IN FINANCIAL MATHEMATICSS
THE MIDDLE EAST TECHNICAL UNIVERSITY , ANKARA-TURKEY**

The Institute of Applied Mathematics (IAM) at The Middle East Technical University (METU) invites applications from qualified candidates to fill new positions in 2007-2008 for postdocs and faculty in the field of Financial Mathematics. Candidates must hold a Ph.D degree and have some experience in both teaching and research. Successful candidates must be able to guide Ph.D students in their research activities.

The positions are in various fields of Financial Mathematics, including aspects of stochastic calculus; stochastic control;computational finance; risk management; financial optimization; and life and pension insurance. Candidates' main research area should be in at least one of these fields.

Rank is open and salary will be commensurate with experience and publication record. Free housing will be offered within the University campus, where the suburban location offers a pleasant living environment.

METU is a state, teaching and research-intensive university located in Ankara, Turkey. The language of instruction is English and METU offers excellent research, teaching and computing facilities. The Institute of Applied Mathematics at METU is a multi-disciplinary graduate school founded in 2002. IAM offers three graduate programs leading to MS and PhD degrees: Cryptography, Scientific Computing and Financial Mathematics. The Financial Mathematics Program currently has 31 MS and 10 PhD students. The regular teaching load is 3 courses per year with a maximum class size of 20. For more detailed information on METU and IAM please visit <http://www.metu.edu.tr> and <http://www.iam.metu.edu.tr>

Application materials should be mailed, faxed or e-mailed to:
